DWX-52D

Get in shape. Think smart. Mill in-house.

Introducing the DWX-52D 5-Axis Dental Mill for Maximum Efficiency and Precision

The DWX-52D 5-axis dental mill offers a highly reliable, precise, easy-to-use and affordable solution. Produce a wide range of restorations, including crowns, copings, bridges, inlays and onlays, veneers, abutments, implant bars, screw-retained crowns, digital dentures, models, surgical guides and bite splints. Includes upgraded disc handling, increased material compatibility, improved tool management and other enhanced capabilities to make your lab more efficient and productive.

DWX-52D

New Clamping System

A new snap-on clamp system with six included adapters for 98.5mm discs offers fast and secure set-up of zirconia, wax, PMMA, gypsum, PEEK, glass fibre-reinforced resin, composite resin and CoCr sinter metal materials.

Disc material adapters maintain the original point-of-origin when milling reinserted discs. Nest your restorations even tighter to maximise material usage and reduce unit costs. A pin-type material adapter enables setting up and milling of eight pin-type blocks consecutively.

15-Station Automatic Tool Changer (ATC)

The DWX-52D provides continuous, unattended milling with a 15-station Automatic Tool Changer (ATC) which has a dedicated slot for an included cleaning tool. Load the cleaning tool into the ATC and set it up to automatically sweep away zirconia powder and other material dust for a cleaner milling surface.

User-friendly Design

A user-friendly Virtual Machine Panel (VPanel) enables convenient production and device monitoring from your computer. Email notifications keep you informed of operational status, including milling and maintenance completion, or any errors in order to minimise down time.

Adapter Rack for Increased Efficiency

Six adapters for 98.5mm material discs are included as standard with the DWX-52D, allowing you to queue up multiple milling jobs for efficient job management.

Precision 5-Axis Milling

The DWX-52D simultaneously rotates and tilts discs for deep undercuts and milling large arch applications and other full-mouth restorations with ease.

Intelligent Tool Control

VPanel operation includes an Intelligent Tool Control function that intuitively swaps out tools from their stocker position when they have reached their user-defined lifespan without needing to pause production.

Comprehensive Support Network

In addition to online or telephone assistance, DGSHAPE also offers educational seminars aimed at increasing customers' familiarity and confidence with products and services. Service engineers are also available worldwide to assist customers with any questions they may have.
